SYNTHETIC DEMO / CONTROLLED PUBLIC FIXTURE

# A synthetic two-curve fixture

Formula-generated values for an editable-slide demonstration.

ABSTRACT

This one-page document supplies a clearly labeled synthetic figure and its definitions. It is a controlled source artifact for inspecting image preservation and editable slide structure. It reports no study, experiment, or observations.

## 1. Defined signals

$$y_A(x) = \exp(-0.08\,x)$$

$$y_B(x) = 0.7\,\exp(-0.04\,x)$$

CSV samples: integer x from 0 to 40. No randomness or measurements.

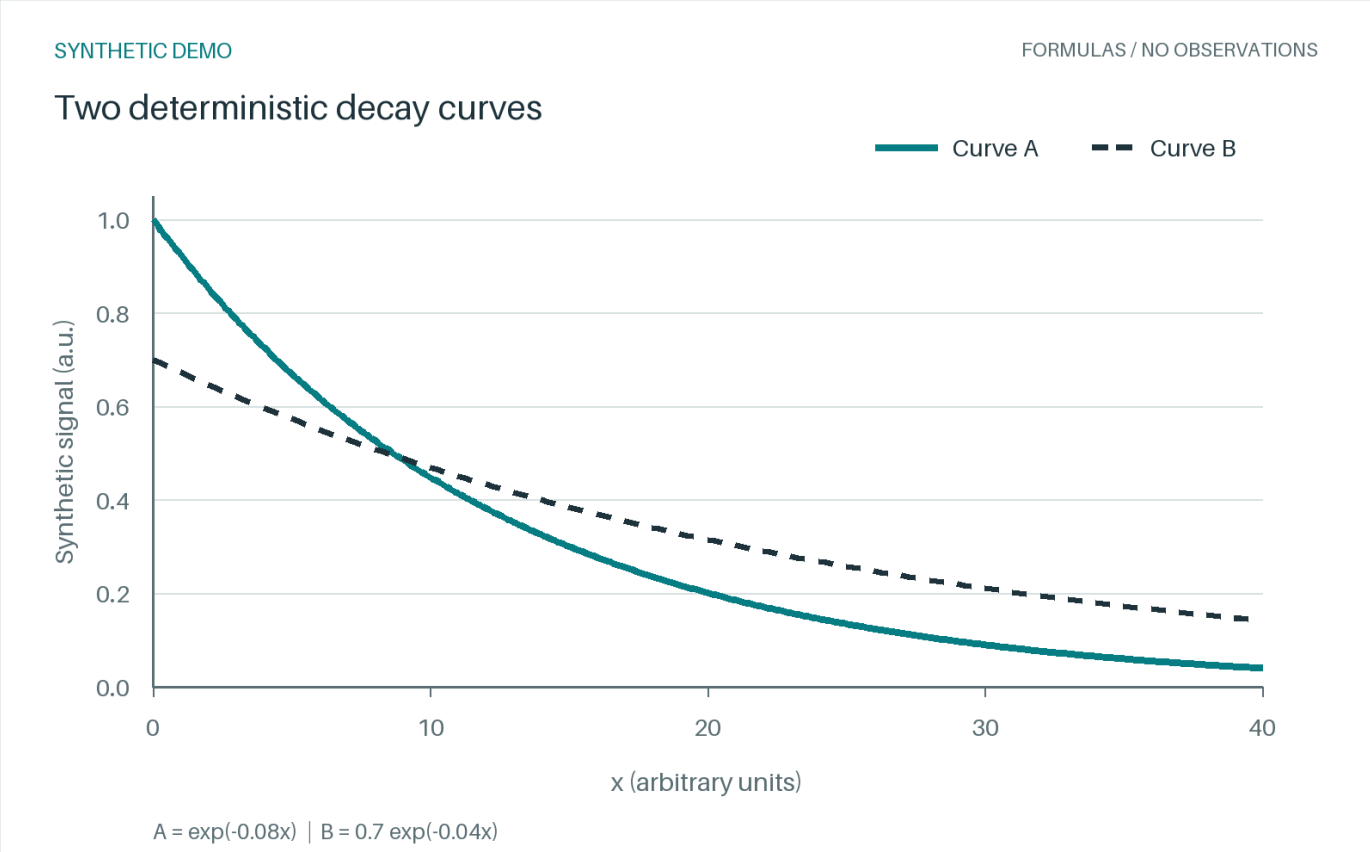

Figure 1. Deterministic decay curves defined above. Curve A is a solid teal line; Curve B is a dashed graphite line. Arbitrary units; this is not measured data.

**SYNTHETIC DEMO / Not a publication, study, or scientific evidence.**
